INFORMATION SECURITY POLICY

Çimtaş will operate Information Security Management System by using high-technology and information effectively, being innovative and change-oriented with the dedication and full participation of all employees;

- To protect the confidentiality, integrity and availability of the information assets,

- To identify and manage the process risks,

- To improve the information security awareness among the employees and the business partners,

- To establish, operate and improve continuously in accordance with the goals of the information security management system complying with international ISO/IEC 27001 standard,

- To comply with all information security related laws, regulations and contracts,

- To monitor the information security incidents, to limit the impacts if inevitable

in order to support the goal of being the best-in-class and preferred partner for the engineered and integrated solutions of the demanding construction projects as stated in our vision.
