

ZERO ACCIDENT PROMISE

For ÇİMTAŞ, safety can be described as the protection of all employees, tools, facilities, machines, knowledge, gathered corporate trust and image that has been acquired in a justified way by the third party, from any hazard, fire, damage and any loss.

Safety is the assurance for sustaining our work.

In case we have to choose, **I have learnt that**, doing our work without accident, life and safety issues are more important and preferential than cost or time of our works.

I understand that everyone has the responsibility of keeping own safety at the first place and then other personnel's safety, products, machines, knowledge and corporate images without hazard by working and employing people; looking after the work carried out; taking all precautions in order to minimize the accident risk to zero and carrying out these kinds of studies and I also understand that our aim is **ZERO ACCIDENT** that should be supported by the employees from all level, included directors, subcontractor and visitors; that counter thinking will not be accepted whatever my rank, seniority and ability are.

At first, I am responsible for my own safety.

If the minimum safety conditions are not provided while I was doing my duty or expected work, I am responsible to take all precautions or claim to be done.

I PROMISE THAT,

I WILL NEVER GIVE UP THE IDEA OF ZERO ACCIDENT AND ITS IMPORTANCE.

I WILL LOOK AFTER ALL EMPLOYEES, WHO ARE WORKING FOR ME AND OTHERS TO SHARE THAT GOAL.

I WILL ALERT THE OTHERS WHO DO NOT TAKE NECESSARY ACTION.

I WILL DO EVERYTHING I CAN DO TO REACH OUR GOAL.

I WILL OBEY ALL THE RULES RELATED WITH LIFE AND SAFETY.

I WILL CONTRIBUTE TO THIS SUBJECT.
